

GOLDGLASS TECHNOLOGIES

Changing the face of glass

A GOLDEN FUTURE...

TURNING GLASS INTO GOLD

GOLDGLASS has long been at the forefront of glass finishing, with revolutionary machinery at affordable prices. We truly are changing the face of glass. We have achieved a lot since our humble beginning as a small family business, the brainchild of founder Zami Goldstein.

Today, Goldglass is an internationally acclaimed brand thanks to innovative and versatile machinery. Our machines are fully automatic, versatile, and can act as standalones or complimentary to each other.

M.R.C-2350-CI

M.R.C-2850-M

GD-7000

LIFT MASTER

MEET THE FAMILY

MRC-2350-CI Glass Painting Machine:

Economic, even-coverage, easy to use and maintain.

MRC-2850-M Modular Glass Painting Machine:

The modular version of our flagship MRC-2350-CI, for larger, heavier and wider projects.

GD-7000 Glass Drying Machine:

A powerful glass drying machine, either as standalone or interfaced with the M.R.C-2350-CI/M.R.C-2850-M.

Lift Master:

Innovative vertical glass accumulator, compatible with all of our machines, as well as any traditional horizontal conveyor machinery in all industries.

COMPLIMENTARY TECHNOLOGIES

All of our machines can be fitted with complimentary parts that take glass processing to the golden standard and beyond. Among these you will find the ceramic paint kit, extensions, and our innovative **Frame Coating** software.

A GOLDEN FUTURE

The bright minds at Goldglass never stop working to create the finest finishing machines in the world. We are always thinking out of the box and formulating unique finishing solutions - this means new products, advanced models, improved functions, impeccable service and every little detail that would make glass finishing smooth, economic, ecological and user-friendly.

WHAT MAKES OUR GOLD SHINE BRIGHTEST?

- Automatic glass detection system
- Automatic operation
- Simple plug-and-run operation
- Low energy consumption – ECO friendly
- Versatile, compact and mobile
- Fast and efficient
